

## CLAIMS

1. A random number selector using a selection ball, comprising:
  - a first selector, provided with a passage and a plurality first pockets each associated with a symbol and operable to receive the selection ball;
  - a second selector, provided with a plurality of second pockets each associated with a jackpot and operable to receive the selection ball; and
  - a guide member, which guides the selection ball which has been passed through the passage in the first selector to the second selector.
2. The random number selector as set forth in claim 1, wherein the first selector and the second selector are coaxially and horizontally arranged while defining a space therebetween in which the guide member is disposed.
3. The random number selector as set forth in claim 2, wherein the first selector and the second selector are rotatable independently.
4. The random number selector as set forth in claim 2, wherein the guide member is vertically movable in the space between a first position operable to guide the selection ball which has been passed through the passage to the second selector and a second position operable to guide the selection ball which has been passed through the passage to a recovery port through which the selection ball is recovered to an initial position.
5. The random number selector as set forth in claim 1, wherein the second

selector is provided with a protrusion located between the second pockets.

6. A bingo game machine, comprising:
  - the random number selector as set forth in claim 1; and
  - a controller, operable to perform a first bingo game using only the first selector, and a second bingo game using both of the first selector and the second selector.
7. The bingo game machine as set forth in claim 6, wherein the controller is operable to provide an additional selection ball used in the second bingo game to at least one player in a case where the at least one player satisfies a predetermined requirement in the first bingo game.
8. The bingo game machine as set forth in claim 7, wherein:
  - the controller is operable to control a virtual player who plays the first bingo game together with the at least one player; and
  - the predetermined requirement is to win over the virtual player in the first bingo game.
9. The bingo game machine as set forth in claim 8, further comprising:
  - a first display, which displays a bingo card of the virtual player; and
  - a plurality of second displays, each of which displays a bingo card of each player,wherein the second displays are located at viewpoints of the first display.
